

**Q: What are the requirements for participating in a High G Racing high performance driving event (HPDE)?**

A: Drivers must be at least 18 years old.

**Q: What can I expect as a Novice driver?**

A: All novice drivers must attend mandatory drivers' meeting before hitting the track. Novice group will start with controlled pace lap. One on one in car instructors will be available upon request. We recommend all drivers study the rule page before any HPDE event.

**Q: What cars are welcome at High G Racing events?**

A: Any safe, well maintained car is acceptable. SUVs and trucks are welcomed upon pre-notice (please contact our staffs in advance before any registration). Open wheels are not allowed at this time.

**Q: Are passengers allowed to ride along?**

A: Passengers are allowed to ride along with DOT approved helmet and closed toe shoes. Passengers are only allowed at front passenger seat with all necessary waivers signed.

**Q: Are convertibles allowed?**

A: Convertibles are allowed provided they have factory or aftermarket installed roll protection. If no roll protection is present, the top must be up in order to participate.

**Q: What are the rules on sharing a car?**

A: If both drivers are running in the same run group, the cost would be \$100 for the additional driver (1 full price + \$100). If you are running one car in 2 separate run groups, i.e., novice and advance, full price for each driver applies.

**Q: Do you offer refunds?**

A: No, we do not offer refunds.

**Q: What happens if weather gets bad?**

A: We run wet or dry. However, the track usability solely depends on track staffs. If the track is closed due to weather before the event, then it will be rescheduled upon track's availability in the future. In fact, a damp track is good for drivers to learn how to control the car and improve the driving skill.
